

**Amendments to the Specification:**

Please replace the paragraph beginning on page 6, line 1 with the following rewritten paragraph:

--Another method of exposing data frame 140 can be via a folded optical path as shown in FIG. 5. Instead of reading a number and having OTUC 10 capture an image on a soft display, OTUC 10 can be used to provide an exposure of label 20 on the camera itself. Thus, the exposure of the data frame 140 is actually a captured image of the label 20. Light source 240 illuminates label 20. An image of label 20 is reflected by mirrors 250 and 260. The close up diopter 80 provides appropriate focus and magnification for OTUC 10 to expose data frame 140. Another optical path (not shown) may be provided to illuminate the label 20 with the light from a flash 15 on OTUC 10.--
